2. Fees related to connecting to the network

2.1. Connection fee

A connection fee will be charged when a new building is connected to the water supply and/or sewer network. The amount of the fee is dependent on the type of the property and permitted building volume. You can request a connection fee calculation from our customer service, tel. +358 40 806 2747 or vesi.karttapalvelu@tampere.fi. The connection fee is charged according to the currently valid price list at the time of conclusion of the water agreement. Value added tax will be added to the price (24 %). As of September 1, 2024, VAT will increase from 24% to 25,5%. For instance, the connection fee of a detached house under 250 m² is EUR 5 520 + VAT 24% = EUR 6 844,80. There is a calculator for calculating the average connection fee available on the Tampere Water website. In addition to the connection fee, the property owner is required to cover the cost of building the service pipes.

If service pipes for the plot at the boundary of the plot have not been built in conjunction with new construction projects, the property owner can have them built by Tampere Water based on a quote or by another contractor. Plot connections are constructed according to the written, approved offers. This includes labor, material, general, and storage costs.

Excavation work for water and sewer pipes will be carried out by the contractor hired by the builder. Tampere Water will connect the property to the core network and the water supply system in the property and invoice the work.
